Results of the call for research and development activity in the scope of non-commercial clinical research - III round

President of the Medical Research Agency Radosław Sierpiński MD, PhD, approved the ranking list containing the results of the call for research and development activities in the field of non-commercial clinical research for the 3rd round of competition.

On the basis of the ranking list drawn up as a result of the call procedure and the available allocation, 9 projects with the total amount of PLN 70 897 792. 31 received financing within the 3rd round of the call. In the 3rd round of the call 51 applications of the total value of over 570 million PLN were submitted, of which the highest number of applications were submitted in the area of cardiology and oncology. 29 applications were submitted for substantive assessment.

At the same time we would like to remind you that due to the fact that projects recommended for co-financing in the first round of the competition used up the allocation assigned for the competition, the President of the Medical Research Agency decided to increase the original allocation for round III by PLN 50,000,000. 00. Due to a very high interest in the call in the third round of NBK 2020, the President of the Agency decided to increase the allocation by over PLN 20 million.
